PROFILE

I am an Audio Visual Arts University graduate seeking employment. Currently, I am studying abroad for my Master's in Game Design and Technology at Gothenburg University. I have experience with various audio and visual production software, programming languages, and software development frameworks. I am equipped with diverse skills, with my interest lying in Game Design and Game Development. I am well organized, punctual, and dedicated in my working environment.

EDUCATION

Game Design - Master's Program, University of Gothenburg, Göteborg

September 2024 — Present

Studying a blend of topics, considering games as long as the required skills for them to succeed, while following the current industry needs.

Interests:

- Game Research
- Computer Graphics (OpenGL and C++)
- Gameplay Design (Game Design Processes and Development of Board Games)
- Simulation Engines (Development of a basic Game Engine using C#)
- Game Development Project (Design and Development of Games)
- Requirements Engineering (Software Documentation)
- Agile Development Processes (Agile Framework, Scrum, Game Development Project using the Unity Engine)

Audiovisual Arts - Integrated Master's Degree, Ionian University, Corfu

September 2018 — June 2023
