PROFILE

Software developer with a background in game development, interactive systems, and web technologies. Experienced in C#, Unity, JavaScript, and C++ through academic and personal projects. Interested in developing interactive applications and building reliable software. In addition, experienced with a diverse range of audio and visual production tools. Currently seeking a junior software development role where I can contribute to production projects and continue developing my engineering skills.

SKILLS

Programming Languages	C#, JavaScript, JAVA, C++, Python PHP, SQL
Technologies & Tools	Unity Engine, Godot, C#, Git, GitHub, MySQL
Creative Software	Blender, 3ds Max, Aseprite, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Adobe Premiere
Other	Flutter, Processing, Arduino, P5.js, Ajax, HTML, CSS, JavaScript, Apache, A-FRAME, Blender, 3ds Max, Aseprite, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Adobe Premiere

EMPLOYMENT HISTORY

[Teacher Assistant at the University of Gothenburg, Jan 2026 — Mar 2026](#)

- Employed by the University of Gothenburg, taking the role of a Teaching Assistant (TA).
- Part of the Teaching Assistants, effectively assisting fellow students during their projects by providing supervision and guidance.
- The course I was assisting as a TA was “Design and Construction of Digital Games”
- I had to work with groups and follow along their design and development journey, providing technical and design-related assistance, and was assigned the task of grading assignments.
- Deepened my knowledge of game design and teaching practices while collaborating with colleagues and teachers from the game design and technology master’s program.

[Apple UK Phone Sales & AppleCare Representative at Teleperformance Greece, Jul 2023 — Aug 2024](#)

- Developed a strong working knowledge of products and services, essential to convey their benefits and value to customers effectively.
- Attended workshops and conferences centered around increasing service skills.
- Upheld the highest standards of honesty and integrity while ensuring sensitive data handling accordingly (GDPR trained).
- Effectively assisted customers with technical issues regarding their devices.
- Established Team Member Score (TMS) goals, receiving positive feedback.

EDUCATION

[Master’s in Game Design and Technology, University of Gothenburg, Sep 2024 — June 2026, 🔗 \[Page\]\(#\)](#)

Studied a blend of topics, considering games as well as the skills required for them to succeed, while aligning with current industry needs.

Interests:

- Web Development (HTML, CSS, JavaScript, P5.js, XAMPP, PHP, MySQL)
- Game Research
- Computer Graphics (OpenGL and C++)
- Gameplay Design (Game Design Processes and Development of Board Games)

- Simulation Engines (Development of a basic Game Engine using C++)
- Game Development Project (Design and Development of Games)
- Requirements Engineering (Software Documentation)
- Agile Development Processes (Agile Framework, Scrum, Game Development Project using the Unity Engine)

Integrated Master's in Audiovisual Arts - Ionian University, Sep 2018 — Jun 2023, [🔗](#) Page

Graduate of the five-year undergraduate program, grade "Excellent" 9.35 / GPA: 3.8

Development of audiovisual expression through teaching and research on the applications of modern audiovisual technology in the broader field of art and mass communication.

Interests:

- Web Development (HTML, CSS, JavaScript, P5.js, XAMPP, PHP, MySQL)
- Programming
- Game Development (C#, Unity)
- Sensory Mechanisms in Art (Arduino, Java)
- 3D Graphics Composition (Blender, Autodesk 3ds Max)
- 2D Graphics Composition (Adobe After Effects, Photoshop, Illustration)
- Virtual and Augmented Reality Environments (A-Frame)
- Sound Design and Sound Art (Adobe Audition)
- Image Processing (Adobe Premiere)
